

OUTDOOR & DIGITAL MARKETING WEBSITE

Comprehensive Development & Design Blueprint

THEME COLORS	TYPE	TECH STACK
#496B88 · Navy Blue #2EAB8C · Sea Green #1B2A4A · Deep Navy	Single-Page Application with Admin Dashboard + Presence Sub-pages	React / Next.js Supabase (DB + Auth) Tailwind CSS

01 · PROJECT OVERVIEW

This document outlines every design and development decision for a premium single-page website for an outdoor advertising & digital marketing agency established since 1994. The site will showcase billboard/OOH services alongside digital offerings — social media marketing, SEO, AI-driven strategies, and UGC ads — with an admin-controlled Presence gallery and a full Supabase-powered dashboard.

Project Type	Single-Page Website + Admin Dashboard + Dynamic Presence Sub-pages
Established	Since 1994 — to be featured prominently in hero section
Brand Color Palette	#496B88 (Steel Blue) · #2EAB8C (Sea Green) · #1B2A4A (Deep Navy) · White accents
Framework	React (Next.js recommended) with Tailwind CSS
Backend / DB	Supabase — Auth, Database, Storage for admin uploads
Scroll Behavior	Smooth single-page scroll with animated section transitions

02 · HEADER & NAVIGATION

The header is fixed/sticky, transparent over the hero and transitions to a solid deep-navy background on scroll. Inspired by the Sahar Advertising header reference image — clean, minimal, professional.

Logo

- Custom logotype — agency name in bold Helvetica-style font with a geometric arrow/billboard icon
- Two-tone: Sea Green icon + Navy wordmark
- Established badge: small italic text 'Est. 1994' beneath the logo

Navigation Links (left-to-right)

- Home
- About Us
- Services (dropdown)
- Clients
- Presence
- Team
- Contact Us

Header Behavior

- Transparent on hero · Frosted-glass blur on scroll with navy/sea-green border bottom
- Active link highlighted with sea-green underline animation
- Mobile: hamburger menu with full-screen slide-in overlay

03 · HERO SECTION — FULL-SCREEN CAROUSEL

The hero occupies 100vh. A carousel of 4–5 high-quality images (billboards, city scenes, digital screens) auto-advances every 5 seconds with a Ken Burns zoom effect. The foreground contains animated text and floating background icons that do NOT dominate the frame.

Background Layer

- Carousel images at full viewport width/height with 30% dark overlay gradient
- Floating blurred SVG icons (Instagram, Facebook, billboard outline, signal tower) — opacity 8–12%, slow rotation/drift animation
- Images auto-transition with 1s crossfade; manual dots at bottom

Foreground Text (animated, staggered entrance)

- Small ALL-CAPS label: 'MARKETING REDEFINED' — sea-green color, letter-spacing 0.3em, fade+slide-up
- H1 Hero Headline: large (72–96px) bold white text, e.g. agency name or core tagline
- Subline: 'Established Since 1994' in medium weight, light gray
- CTA Button: 'Explore Our Work' — sea-green fill, white text, hover lifts with shadow

Animation Sequence

- Label fades in at 0.3s · H1 slides up at 0.6s · Subline at 0.9s · CTA at 1.2s
- On carousel change: text fades out then reanimates for next slide

04 · ABOUT US

Design inspired by the Arrows Advertising reference image: dark background, Pakistan map with city pins on the left, rich text content on the right. Adapted for this agency with modern motion design.

Layout (Two-Column on Desktop)

- LEFT (45%): Interactive SVG/image map of operational cities — pins animate in on scroll
- RIGHT (55%): Founder bio, company story, core values
- Background: deep navy (#1B2A4A) with subtle diagonal pattern overlay

Map Component

- SVG Pakistan outline map (or city-specific region map)
- Animated pin drop for each city — staggered 0.2s each
- Hover on pin: tooltip with city name + office type (HQ / Branch / Liaison)
- Head Office pin: Sea Green · Branches: Navy · Liaison: Gold

Text Content

- Founder story paragraph with a subtle quote highlight (left border sea-green)
- Company mission paragraph
- Three stat counters: Years Active · Cities · Campaigns Delivered — animated count-up

05 · SERVICES — EXCEPTIONAL DESIGN

The Services section must be visually competitive and memorable. Use an overlapping-card scroll pattern: as the user scrolls, each service card slides into view and partially overlaps the previous, creating a layered depth effect — similar to Apple product pages.

Interaction Pattern: Stacked Scroll Cards

- Section is pinned (sticky scroll) — cards stack and reveal one at a time
- Each card: full-width or near-full-width, alternating image left / right
- Card entrance: slide up + fade + slight rotation correction (3deg → 0deg)
- Progress indicator: vertical dots or line on the right side

Service Cards (7 total)

01

Outdoor Billboard Advertising

Strategic placement of static, backlit, and digital billboards across prime locations in major cities. Site selection, design production, and campaign monitoring included.

02

SMD / LED Digital Screens

High-brightness LED and SMD screen networks for dynamic content delivery. Real-time content updates, dayparting scheduling, and audience targeting.

03

Social Media Marketing

Paid and organic campaigns across Facebook, Instagram, TikTok, LinkedIn, and YouTube. Full funnel strategy from awareness to conversion.

04

Social Media Management

End-to-end community management: content calendar, posting, engagement monitoring, reporting, and brand voice consistency.

05

UGC Ads

User-Generated Content ad production and deployment. Authentic creator-style ads that outperform traditional creative in cost-per-result.

06

SEO Optimization

Technical SEO audits, on-page optimization, backlink building, local SEO for Pakistan markets, and monthly ranking reports.

07

AI-Driven Marketing Strategies

Leveraging AI tools for ad creative generation, audience segmentation, predictive analytics, chatbot automation, and performance optimization.

06 · MEDIA STRIP — BETWEEN SECTIONS

Between major sections, insert a full-width horizontal image marquee strip. High-resolution photos of billboards, campaigns, and city placements scroll infinitely left. This serves as visual proof-of-work and breaks the text-heavy layout.

- Auto-scrolling image strip — infinite loop, pausable on hover
- Images: 300×200px thumbnails, slight rounded corners, slight shadow
- Gap between images: 16px · Speed: 30s for full cycle
- Two strips can be placed: one after Services, one before Presence

07 · CLIENTS SECTION

A clean, brand-logo-focused section. No distracting background — let the client logos speak. Logos animate in with stagger and continuously scroll in a marquee on a second row.

- Section heading: 'Brands That Trust Us' in navy, centered
- Row 1: Static featured logos in a 4–5 column grid — fade in on scroll
- Row 2: Infinite scrolling logo marquee — left scroll, hover pauses
- All logos grayscale by default → full color on hover
- Client name appears as tooltip or caption below logo on hover
- Background: white or very light gray for maximum contrast

08 · PRESENCE — CITY TILES

A dynamic, admin-managed gallery of cities where the agency operates. Displayed as image tiles with city name overlaid. Clicking a tile opens a dedicated sub-page using conditional rendering (React Router / Next.js dynamic routes).

Tile Design

- Grid: 3 columns desktop · 2 tablet · 1 mobile
- Each tile: full-bleed city/campaign photo, dark gradient overlay at bottom
- City name in white bold text, bottom-left
- Campaign count badge top-right: e.g. '12 Campaigns'
- Hover: image scales 105%, overlay darkens, 'View Gallery' CTA appears
- Entrance: staggered fade-slide-up per tile on scroll

City Sub-page (Dynamic Route)

- Route: /presence/[city-slug] — e.g. /presence/lahore
- Hero: city name + number of placements
- Masonry or grid gallery of all billboard/placement images for that city

- Back button returns to main page Presence section
- All images uploaded and managed by admin via Supabase Storage

Admin Upload (Supabase)

- Admin selects city → uploads images → sets captions → publishes
- Supabase Storage bucket: presence-images
- Table: presence_cities (id, name, slug, cover_image, created_at)
- Table: presence_images (id, city_id, image_url, caption, sort_order)

09 · TEAM SECTION

Interactive and beautiful team showcase. Avoid the typical boring grid of headshots. Use a layered card design with role color-coding and micro-animations.

- Layout: Horizontal scrollable cards on mobile · 3-col grid on desktop
- Card: Photo (circle crop with sea-green border), Name, Role, short quote
- Hover: Card flips (CSS 3D) — back shows LinkedIn link + fun fact
- Role badge: color-coded — Leadership: Navy · Creative: Sea Green · Digital: Gold
- Section header: 'The People Behind the Work' — animated character reveal
- Background: subtle dark navy gradient to differentiate from adjacent sections

10 · CONTACT US

A visually engaging contact section with a functional email form. Form submissions send to the agency's email using EmailJS or a Supabase Edge Function + SMTP.

Layout

- Two-column: LEFT = contact info + map embed · RIGHT = form
- Background: Deep navy with sea-green geometric accent shapes

Contact Info (Left)

- Head Office address with icon
- Phone numbers (Lahore HQ, Karachi, Islamabad)
- Email address with mailto link
- Social media icon links: LinkedIn, Instagram, YouTube, Facebook
- Google Maps embed (Lahore office)

Email Form (Right)

- Fields: Full Name · Company · Email · Phone · Service Interest (dropdown) · Message
- Service dropdown options: Billboard · SMD · Social Media · SEO · AI Strategy · Other
- Submit button: sea-green, animates to checkmark on success
- Integration: EmailJS (client-side) OR Supabase Edge Function → SMTP
- Form data also stored in Supabase table: contact_submissions

11 · FOOTER

- Background: Deep navy (#1B2A4A)
- 4-column layout: Logo + tagline · Quick Links · Services · Contact + Social
- Office addresses: Lahore (HQ), Karachi, Islamabad

- Social icons: LinkedIn, Instagram, YouTube, Facebook — hover turns sea-green
- Bottom bar: © 2025 [Agency Name]. All rights reserved. | Privacy Policy
- Thin sea-green top border on footer

12 · ADMIN DASHBOARD — SUPABASE

A protected admin panel (separate route /admin) for managing all dynamic content. Secured by Supabase Auth with email/password login.

Supabase Database Schema

- **presence_cities**: id, name, slug, cover_image_url, sort_order, created_at
- **presence_images**: id, city_id, image_url, caption, sort_order, created_at
- **clients**: id, name, logo_url, website_url, is_featured, sort_order
- **team_members**: id, name, role, department, photo_url, quote, linkedin_url, fun_fact, sort_order
- **contact_submissions**: id, name, company, email, phone, service_interest, message, created_at, is_read
- **site_settings**: id, key, value (for tagline, hero images, about text etc.)

Admin Panel Features

- Dashboard home: stats (contacts today, cities, clients, team members)
- Presence Manager: add/edit/delete cities · drag-to-reorder tiles · upload images
- Client Manager: upload logos · toggle featured · set display order
- Team Manager: add/edit team members · upload photos
- Contact Inbox: view submissions · mark as read · export CSV
- Site Settings: edit hero carousel images · update taglines · about text

13 · ANIMATIONS & EFFECTS REFERENCE

Use Framer Motion (React) or GSAP for all animations:

Hero Text	Staggered fade+slide-up · letter-by-letter for tagline
Hero Carousel	5s auto-advance · 1s crossfade · Ken Burns zoom
Background Icons	Slow orbit/drift · opacity 8–12% · blur filter
About Map Pins	Drop animation staggered 0.2s each on scroll entry
Stat Counters	Count-up from 0 on scroll entry · 1.5s duration
Service Cards	Sticky scroll stack · slide-up + rotation correct on enter
Media Strip	Infinite CSS marquee · pause on hover

Client Logos	Fade-in grid + infinite scroll marquee row
Presence Tiles	Stagger fade-slide-up · image scale on hover
Team Cards	CSS 3D flip on hover
Section Transitions	Fade+slide-up via IntersectionObserver · threshold 0.15
CTA Buttons	Hover: lift + shadow + slight scale(1.03)
Form Submit	Button morphs to spinner then checkmark

14 · FULL PAGE STRUCTURE & SCROLL ORDER

- 1. Header (sticky)
- 2. Hero — Full-screen carousel with animated text
- 3. About Us — Map + story
- 4. [MEDIA STRIP] — Billboard image marquee
- 5. Services — Stacked scroll cards
- 6. [MEDIA STRIP] — Campaign image marquee
- 7. Clients — Logo grid + marquee
- 8. Presence — City tiles (links to dynamic sub-pages)
- 9. Team — Interactive flip cards
- 10. Contact Us — Form + map
- 11. Footer

Separate Routes:

- /presence/[city-slug] — City gallery sub-page
- /admin — Protected admin dashboard
- /admin/presence, /admin/clients, /admin/team, /admin/inbox

15 · TECH STACK & KEY DEPENDENCIES

Framework	Next.js 14 (App Router) — SSR for SEO, dynamic routes for Presence
Styling	Tailwind CSS + custom CSS variables for theme colors
Animations	Framer Motion (primary) · GSAP (for scroll-pinned service stack)
Database	Supabase — PostgreSQL + Auth + Storage + Realtime
Email	EmailJS OR Resend.com via Supabase Edge Function

Image Optimization	Next.js Image component + Supabase CDN
Deployment	Vercel (recommended) — free tier covers this project
Icons	Lucide React or Heroicons
Map	React Simple Maps (SVG) for Pakistan presence map
Carousel	Embla Carousel or Swiper.js

This PDF serves as the complete design & development blueprint. Each section above maps directly to a React component. Build order recommendation: Header → Hero → About → Services → Clients → Presence → Team → Contact → Footer → Admin Dashboard. All colors, interactions, database tables, and animation specs are defined in this document.
